

NP Innovation: The path to PLM on the Cloud in 10 days

50% more efficient
50% greater design re-use
100% BOM accuracy

BOM management

"With Teamcenter, we have a reliable data source. Today our BOM is always 100 percent correct, which has led to fewer mistakes and above all, faster time-to-market."

Gustav Kågesson, Design Manager, NP Innovation

10-day delivery

Change management

"Changes are now managed using Teamcenter... it gives us the knowledge needed to understand when to make a change and when to act as a consequence of a change. This gives us full control over our product development and facilitates innovation."

Gustav Kågesson, Design Manager, NP Innovation

Monthly expense

"Our designers are very pleased with Teamcenter... they can now collaborate and share data 50% more efficiently... they have increased design re-use by 50%, saving both time and money in the process."

Gustav Kågesson, Design Manager, NP Innovation

"...Siemens PLM Software partner NEXTAGE... not only suggested a solution in terms of the proven product lifecycle management system Teamcenter, but also... performed the implementation that was smoothly delivered in only 10 days."

Gustav Kågesson, Design Manager, NP Innovation

START

- Four Solid Edge designers
- Minimal IT staff and budget
- Zero up-front hardware investment

NP Innovation develops water treatment solutions for aquaculture, industrial and municipal applications. Building on 30 years of experience, the company is on a mission to change the industry with innovative design and manufacturing, and reduced costs for investments, operations and maintenance.

NP Innovation recently implemented the Teamcenter® product lifecycle management solution on the Cloud in just 10 days.
